  secondary school

ABOUT ME

- Excellent oral communication.

- Able to learn new concepts and easily share knowledge with creative examples.

- Leadership skills in managing a team and work as a team player to provide the expected output.

- Excellent Artist and painter, I can sketch portraits to landscapes in canvas and digitally as well, which ultimately is the base of my creativity that I apply to my work as well.

- Good at sports mainly in football, cricket and table tennis.

OBJECTIVE

Skilled and experienced to create Design system, UI Patterns, Visual design, User-centered design. Being able to create prototypes from scratch to fully designed web pages or apps for desktop and mobile.

WORK & ACCOMPLISHMENT

- Able to provide excellent User Interface design and user centric solutions to client projects.

- My speciality is creating wireframe mock ups from scratch on paper to establishing it into fully coded HTML pages suiting cross browsers. Highly skilled in Figma & Adobe XD.

- Skilled in artworks that include icon creation, logo designing, brochures, newsletters, posters, backdrops, vectors, business cards using Adode CC applications.

- Highly experienced in creating web pages from scratch. Using HTML CSS3 and jquery. Able to bring about every latest trend on necessity.

- Able to automate using Illustrator, saving huge amounts of time to create personalised in-vites, business cards and other printable or web related formats. Able to create vector based designs with ease to provide visual assistance to web backgrounds.

- Self motivated and skilled in training and team management. I've conducted training ses-sions in Angular 2+. I've been able to make everyone understand the value and ease in component based front end design.

- Good in collecting user surveys and project requirements. I'm able to analyse and visualise users point of view and prioritise design based on UX results rather than focusing on the mere completion of a project.

- I'm able to keep up tight deadlines and work within the time scale. Good in adapting to technology and team members. I can communicate the issues and can take feedbacks.

TECHNOLOGIES & SOFTWARES

- HTML, CSS3, SASS, Javascript, Jquery, Bootstrap, Angular 2+ for Front end development.

- Adobe Photoshop, Illustrator, Animate CC for creating artworks for logo design, icons, web and print ads, animated html5 ads, brochures, newsletters and infographics.

- Figma, Adobe XD for rapid prototyping.

- Adobe Illustrator for automation.

- PDF Reactor and Adobe Indesign for styling and creating PDF documents.
